

THE COST OF IRAQ

Who Pays the Price?

\$463 billion has been spent to fund the war in Iraq. \$463 billion could have funded any of the following:

- more than 8 million new elementary school teachers
- Head Start preschool places for over 61 million children
- health care for more than 277 million kids
- more than 4 million affordable housing units

"A nation that continues year after year to spend more money on military defense than on programs of social uplift is approaching spiritual death."

— Dr. Martin Luther King, Jr.
